

COOPER CITY PARKS & RECREATION

Thor Guard Lightning Prediction System

STEP 1

THE HORN INDICATES LIGHTNING IS NEARBY

When the Thor Guard system detects lightning in the local area, it will sound a **15-second horn blast**

STEP 2

SEEK SHELTER AS SOON AS POSSIBLE

All patrons will need to clear the outdoor facilities as soon as possible and go inside a building or vehicle

STEP 3

STAY INSIDE UNTIL THE STORM HAS PASSED

During this period, a strobe light on top of the building will light up and will continue to operate until the weather clears

STEP 4

THREE SHORT HORN BLASTS MEANS IT IS SAFE TO GO BACK OUTSIDE

Everyone must remain inside until **three short horn blasts** signal the "all clear"

STEP 5

YOU CAN NOW RESUME YOUR ACTIVITIES OUTSIDE

Once the "all clear" is given, patrons can resume their activities outside
